STATEMENT

I work across applied economics, academic research, and data science on labor markets, regional development, and economic ecosystems.

Interests: future of work, local and regional economic development, and wellbeing.

EXPERIENCE

Radius Intelligence / Head of data science and engineering

May 2025–Present

Built from scratch and now run RI's data department end to end. Key outputs:

- *RI Technologies*, an integrated workforce planning system spanning exploration, analytics, forecasting, and diagnostic suites, with companion training and staffing inventories, pulled together into a digital twin of the employer's workforce.
- *RI Labs*, a labor market intelligence suite built on opportunity scoring, supply-demand gap identification, market signals, and similarity clustering, covering every US occupation and state.
- Research agenda spanning a skills-task production function modeling AI's effect on labor markets, and migration flow estimation across jobs and geography.

To run these, developed:

- Compliant multi-tenant intelligent data layer reconciling federal, commercial, employer, and academic sources (over 200 datasets, millions of records) across every US occupation and geography, with a RAG retrieval system over it.
- Occupation-resolution engine mapping any messy job title to a canonical taxonomy I made and to a federal occupation code, through: regex matching, embeddings, three fine-tuned transformer models, with an LLM fallback.

Currently building an AI companion and a digital twin of the US labor market, grounded in flow-based economics and econometrics.

Jobs for the Future

Senior Manager

Apr 2024–Apr 2025

Program Manager

Jan 2022–Apr 2024

- Built a US Regional Green Workforce Readiness Dashboard, featured in JFF's national press launch.
- Led a US AI job-displacement study on in-demand, resilient, and at-risk skills.
- Built an occupational segregation tool guiding JFF's green workforce strategy.
- Guided Verizon's initiative to place 500,000 under-represented individuals into quality careers, managing a team of 3 and securing six-figure expansion funding.
- Led JFF to sign the Global Solutions Initiative *Call for Action*, elevating the work to G20 and G7 audiences.

OFCE (Sciences Po) / Research Assistant

May 2021–Jan 2022

- Built a multilingual fiscal policy budget database to estimate fiscal multipliers.

EDUCATION

Université Paris 8

PhD in Economics

2024–Present

Essays on resilient economic development, an empirical ecosystem approach. Empirical line includes network econometrics and SEM. Supervisors: Thibault Darcillon and Matteo Cavallaro (Paris 8), Francesco Saraceno (Sciences Po/OFCE).

Sciences Po

MPhil in Economics

2018–2020

Fulbright Scholar Thesis supervised by Xavier Ragot (OFCE); published in Oxford's *Social Macroeconomics*.

University of Pittsburgh, Honors College

BPhil, Economics and International Studies

2013–2017

Summa cum laude. Brackenridge Fellow.

TEACHING

Sciences Po School of Public Affairs. INSEAD. Northwestern University.

Jun 2020–Present

STACK

Python (pandas, NumPy, statsmodels, scikit-learn, statsforecast; matplotlib, Plotly, Plotly Dash). SQL (Postgres, dbt). R, Julia, MATLAB, Dynare, STATA. Supabase. LaTeX. Git.

WRITING

Substack on labor markets and the future of work. Author of JFF research and public-facing dashboards.

AI

Daily user for code, analysis, and drafting. Verify everything.

LANGUAGES

Native: Italian, French, English, Spanish. Conversational: German.
