STATEMENT

I work across academic research, policy, and data engineering on labor markets, regional development, and economic ecosystems.

Interests: future of work, local and regional economic development, and wellbeing.

EXPERIENCE

Radius Intelligence / Head of data science and engineering

May 2025–Present

Built from scratch and now run RI's data department end to end. Key outputs:

- *RI Technologies*, an integrated workforce planning system spanning exploration, analytics, forecasting, and diagnostic suites, with companion training and staffing inventories.
- *RI Labs*, a labor market intelligence suite built on opportunity scoring, supply-demand gap identification, market signals, and similarity clustering, covering every US occupation and state.
- Research agenda spanning a skills-task production function modeling AI's effect on labor markets, and migration flow estimation across jobs and geography.

To run these, developed:

- Compliant multi-tenant intelligent data layer reconciling federal, commercial, employer, and academic sources across every US occupation and geography, with a RAG retrieval system over it.
- Three fine-tuned transformer models for job data standardization.

Currently building an AI companion and a digital twin of the US labor market, grounded in flow-based economics and econometrics.

Jobs for the Future / Senior Manager

Jan 2022–Apr 2025

- Built a US Regional Green Workforce Readiness Dashboard, featured in JFF's national press launch.
- Led a US AI job-displacement study on in-demand, resilient, and at-risk skills.
- Built an occupational segregation tool guiding JFF's green workforce strategy.
- Guided Verizon's initiative to place 500,000 under-represented individuals into quality careers, managing a team of 3 and securing six-figure expansion funding.
- Led JFF to sign the Global Solutions Initiative *Call for Action*, elevating the work to G20 and G7 audiences.

OFCE (Sciences Po) / Research Assistant

May 2021–Jan 2022

- Built a multilingual fiscal policy budget database to estimate fiscal multipliers.

EDUCATION

Université Paris 8

PhD in Economics

2024–Present

Essays on resilient economic development, an empirical ecosystem approach. Empirical line includes network econometrics and SEM. Supervisors: Thibault Darcillon and Matteo Cavallaro (Paris 8), Francesco Saraceno (Sciences Po/OFCE).

Sciences Po

MPhil in Economics

2018–2020

Fulbright Scholar Thesis supervised by Xavier Ragot (OFCE); published in Oxford's *Social Macroeconomics*.

Pittsburgh, Honors College

BPhil, Economics and International Studies

2013–2017

Summa cum laude. Brackenridge Fellow.

TEACHING

Sciences Po School of Public Affairs. INSEAD. Northwestern University.

Jun 2020–Present

STACK

Python (pandas, statsmodels, scikit-learn, statsforecast). R, Julia, MATLAB, Dynare, STATA. SQL (Postgres, dbt). Supabase. LaTeX. Git.

AI

Daily user for code, analysis, and drafting. Verify everything.

LANGUAGES

Native: Italian, French, English, Spanish.
Conversational: German.
