STATEMENT

Economist working across applied and academic research on labor markets, regional development, and the future of work. Finishing a PhD on resilient regional economies.

EXPERIENCE

Radius Intelligence / Head of Data Science and Engineering (now advisory)

May 2025–Present

Built the company's data and research function from zero, on my own.

- *AI at Work*: a public index of AI use, jobs and training in the US, built on my skills-task model and updated with each data release.
- *RI Labs*: labor market intelligence for every US occupation and state, with opportunity scoring, supply-demand gaps, and similarity clustering; a digital twin of regional employer and training-provider dynamics, grounded in flow-based economics.
- *RI Technologies*: workforce planning and forecasting system, with blueprints for new facilities that have no HR history; a digital twin for facility-level analysis, skill make-up, and talent availability.
- *Data layer*: 200+ federal, commercial, employer, and academic sources reconciled across every US occupation and geography; an LLM engine mapping any job title to a canonical taxonomy and federal code.

Jobs for the Future / Senior Manager (from Apr 2024), Program Manager

Jan 2022–Apr 2025

- Led Verizon's initiative to train and place 500,000 underrepresented people in quality careers; managed a team of 3 and secured six-figure expansion funding.
- Led JFF to sign the Global Solutions Initiative *Call for Action*, taking the work to G20 and G7 audiences.
- Led one of the earliest national AI job-displacement studies, on in-demand and at-risk skills.
- Built the US Regional Green Workforce Readiness Dashboard, featured in JFF's national press launch, and an occupational segregation tool guiding JFF's green workforce strategy.

OFCE and Banque de France / Research Assistant, then Research Intern

2019, 2021–2022

- Built a multilingual fiscal policy budget database to estimate fiscal multipliers.

SELECTED PUBLICATIONS

- *Wellbeing and macroeconomics: a SAGE approach.* Oxford's *Social Macroeconomics* series, 2021.
- Working papers: *Slow ecosystems* (2026); *AI exposure at three levels* (2026); *Where occupations move* (2026); *Two crises, one structure* (2025); *Where workers come from* (2025); *A regional development ecosystem framework* (2024); *When to raise taxes* (2023); *The anticipation content of fiscal policy* (2021).
- In progress, wellbeing and macroeconomics: *Wellbeing and the social fabric* (2024); *Participation gradients and coordination traps* (2025); *Regional basins and the social fabric* (2026).
- JFF: *Unlocking the promise of AI for Black learners and workers* (2025); *How employers can prepare workers for an AI-driven economy* (2024); *Unequal opportunities: quality and diversity in green jobs* (2024); *Investing in inclusion and impact across the learner journey* (2023).
- *From observation to action: multidimensional wellbeing in economic models*, Global Solutions Initiative.

EDUCATION

Université Paris 8
PhD in Economics
2024–Present

Essays on resilient economic development, an empirical ecosystem approach.
Supervisors: Thibault Darcillon and Matteo Cavallaro (Paris 8), Francesco Saraceno (Sciences Po/OFCE).

Sciences Po
MPhil in Economics
2018–2020

Fulbright Scholar. Engaged with senior policy audiences through the Fulbright and Sciences Po networks. Thesis supervised by Xavier Ragot (OFCE); published in Oxford's *Social Macroeconomics* series.

University of Pittsburgh, Honors College
BPhil, Economics and International Studies
2013–2017

Summa cum laude. Brackenridge Fellow.

TEACHING

Sciences Po School of Public Affairs. INSEAD. Northwestern University.

Jun 2020–Present

SELECTED TALKS

Research seminar, Université Paris 8 (2025); Green Workforce Readiness Dashboard workshops for mayors and workforce boards (2024); Verizon initiative presented to its Board of Directors (2024).
